COMPANY OVERVIEW · 2026 · V2

REGULATED WORKFLOW PLATFORMS · MIDRAND, JOHANNESBURG

Deis Technologies

We build the software regulated South African businesses run on.

Onboarding, verification, customer engagement, collections and governance for lenders, insurers, fintechs and public-sector programmes — built for Home Affairs, DebiCheck, POPIA and Section 129 rather than retrofitted for them. API-first and modular: run the whole stack, or slot one service into an existing workflow.

2 + 3 Shared services and platforms	**3** Deploy options, incl. yours	**API + portal** Every product	**SA North** Azure region

TWO SHARED SERVICES · USED BY EVERY PLATFORM WHERE NEEDED

DocuFii

SHARED SERVICE · VERIFY

Extract. Verify. Understand.

Document intelligence and identity verification in one API and one portal, checked against Home Affairs, CIPC, credit bureaus and sanctions sources.

- Bank statements and payslips as decision-ready data
- Home Affairs checks with liveness and face match
- KYB, AML, PEP and sanctions. No data stored by default.

For lenders, banks, insurers and fintechs
docufii.deistech.co.za · also on Azure Marketplace

OmniLink

SHARED SERVICE · ENGAGE

Connect. Engage. Automate.

The WhatsApp channel for every Deis platform and for your own customer journeys, in one consented, audited thread.

- No-code bots with hand-over to a live agent inbox
- Reminders, Pay by Link and Scan to Pay inside the chat
- Registered Meta Tech Provider

For lenders, insurers and collections teams
omnilink.deistech.co.za · WhatsApp, SMS, email and voice

THREE PLATFORMS · EACH DEPLOYED ON ITS OWN

CollectIQ

PLATFORM · COLLECT

Manage. Recover. Optimise.

The full collections and recovery system of record. Every rand traceable from mandate to ledger.

- Four rails on one customer record
- NCA guardrails in the workflow
- Reconciliation to the rand

For lenders, managing agents and collectors
collections.deistech.co.za

GovernIQ

PLATFORM · GOVERN

Govern. Manage risk. Comply.

Governance, risk and compliance built around South African law, with every action on a full audit trail.

- Risk register and heat maps
- Controls testing with evidence
- Policies, incidents, attestations

For risk and compliance teams in financial services
grc.deistech.co.za

IndigentIQ

PLATFORM · MUNICIPAL GRANTS

Apply. Verify. Support.

Municipal indigent grant administration, from field capture to approval and renewal, under your municipality's name.

- Field capture with GPS
- Registry and bureau checks
- Ward approvals and renewals

For municipalities and their service providers

SEVEN PROBLEMS WE SOLVE EVERY DAY

Start with the problem. We map it to the platform that solves it.

Begin with one service and add more as you grow. See it run first, on your own data.

THE PROBLEM	WHAT DEIS DOES	PLATFORM
Customer onboarding and KYC	Home Affairs, liveness, face match and FICA evidence.	DocuFii
Bank-statement & payslip intelligence	Income, expense and affordability data, tamper-checked.	DocuFii
Engagement & payments on WhatsApp	Bots, a live agent inbox, reminders and Pay by Link.	OmniLink
Collections and recovery	Four rails, recovery within NCA rules, reconciliation.	CollectIQ · OmniLink
Governance, risk and compliance	Risks linked to controls, tests and evidence.	GovernIQ
Municipal indigent administration	Field capture, household checks, registers, renewals.	IndigentIQ
Lending decisions	Verify, assess affordability, set up the mandate.	DocuFii · CollectIQ

BUILT FOR REGULATED SOUTH AFRICAN SECTORS

Banking
Onboarding, KYC refresh, governance.

Insurance
Onboarding, claims documents, WhatsApp.

Financial services
FICA, AML screening, compliance.

Lending and credit providers
Affordability, mandates, NCA collections.

Debt collection
Every rail, within Section 129 rules.

Public sector
Indigent registers, household checks.

DEPLOY WHERE YOUR DATA MUST LIVE

Deis cloud
Azure South Africa North, fully managed by Deis.

Deis infrastructure
Dedicated infrastructure, run by Deis.

Your infrastructure
On premises or your cloud; data stays with you.

ONE STANDARD OF TRUST · SIX LAYERS OF DEFENCE

EDGE	Cloudflare and Azure APIM, TLS enforced	GATEWAY	Production APIs require gateway-injected secrets	NETWORK	Isolated virtual networks with segmented subnets
EGRESS	Azure Firewall routing with allowlisted traffic	IDENTITY	Managed identities, Key Vault credential storage	MONITORING	Microsoft Defender for Cloud

Home Affairs · POPIA by design · FICA · NCA · Section 129 · Tamper-evident audit

REGULATED AND ACCOUNTABLE · HELD BY DEIS TECHNOLOGIES (PTY) LTD

- Registered credit provider · NCRCP22187
- SACRRA member
- Registered Meta Tech Provider
- ISO 27001 and SOC 2: in progress
- Level 1 B-BBEE contributor
- Associate member of the Credit Association of South Africa (CASA)
- Member of the Microsoft AI Cloud Partner Program · ISV
- PAIA manual published · Reg. 2022/595177/07

PRICING

Call for a quote.

Priced to the products, volumes and deployment you need, and confirmed after a short scoping call covering API access, onboarding, integration support and data migration. DocuFii is also available on Azure Marketplace. Registry and bureau checks need signed data-provider agreements and POPIA consent.
